

deel.

When to use

Akai vs Claude

One-off work? Use **Claude**.
Repetitive operational workflows? Use **Akai**.

1. The decision is simple

Use Claude when...

You're writing something once

You need analysis or reasoning

You're coding

You're brainstorming or creating content

It's a one-off task or request

Use Akai when...

The same process repeats

Multiple systems are involved

You need scheduling or automation

Teams share the workflow

Humans only approve exceptions

Rule of thumb
If you're asking AI to think, start with **Claude**.
If you're asking AI to do the work repeatedly, start with **Akai**.

2. Quick comparison

Capability	* Claude	A Akai
Recurring workflows	—	✓
One-off tasks or requests	✓	—
Multi-system orchestration (connects to any system, including internal tools)	✓	✓
Automated multi-agent orchestration	—	✓
Scheduled execution	✓	✓
Reasoning & analysis	✓	✓
Writing & drafting	✓	✓
Reminders & alerts that are part of workflows	—	✓
Team collaboration on the same agents	—	✓
Extra controls & permissions	—	✓
Self-improving workflows	—	✓
Deel built and controlled, including its development roadmap	—	✓
Managing token spend	✓	✓
Dashboards & live views	—	✓

3. Example scenarios

Write a Q3 proposal

Claude

One-off task. Requires judgment and synthesis.

Summarise 20 Zendesk tickets (once)

Claude

Pattern recognition + synthesis. If this becomes weekly → consider Akai.

Every Monday: pull invoices, check compliance, update Sheets, post to Slack

Akai

Recurring + multi-system + real operational impact.

Salesforce → Jira → update manager

Akai

Same steps every time across multiple systems.

Tell me which clients have overdue contracts (one-off report)

Claude

Ad hoc report or dashboard.

Monthly contractor data sync (Deel Admin → Sheets → report)

Akai

Recurring + multi-system + heavy data.

4. Akai shines when...

Data entry & bulk updates

Payroll processing

Report generation & exports

Client onboarding

Multi-step approval processes

Compliance checks & document workflows

Unstructured document reading

Scheduled reporting

5. Native tools first

Use **Slack** or **Calendar** for one-off reminders and events.

Use **Looker**, **Zendesk**, or the native tool for dashboards and live views.

If the report or view already exists in a native tool, use that first.

Use Akai when it's part of a recurring SLA or alert workflow.

6. Need help?
